

REALCLOUD

HOSTED APPLICATION SERVICES

Windows server based application in the cloud, making your systems available securely from anywhere.

PRODUCT DESCRIPTION

Looking to take advantage of the Cloud? RealCloud offers you a simple pay per user model that takes away all the hassle of owning and managing your own hardware. Take advantage of accessing your application from any location over secure SSL 2048bit encrypted connection. You no longer have to worry about redundancy or back-ups – it's all included! Suitable for any Windows server based applications.

BENEFITS

- ✓ **SECURE**
All services located in a secure Tier 1 datacentre in Johannesburg.
- ✓ **BUILT IN REDUNDANCY**
Redundant internet links and Windows 2012 R2 servers in a redundant configuration.
- ✓ **DAILY BACKUPS**
15 min server snapshots and full daily backups.
- ✓ **ACCESS FROM ANYWHERE**
Accessible securely from any location with full SSL(2048 bit) encryption.

FROM R285 PER USER P/M

TRAVEL AGENTS

Why not move your Quicktrav accounting server onto our hosted model? You will have better redundancy, managed back-ups and you don't have the risk of your server being stolen. From only R285 per user p/m, RealCloud is perfect for smaller Travel Agents.
